DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Applicant's formal drawings were received by the Office on January 26, 2004 and have been approved by the Examiner.

Allowable Subject Matter

3. Claims 1-54 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 17, 28, and 44 describe details of an exercise load intensity evaluation device. Specifically, claim 1 recites the unique combination of a non-invasive "ejection duration measurement section" and an "ejection duration change detection section" for sensing changes in ejection duration. Of the references of the prior art, only the Koning et al (US 4,730,619) patent describes a device having these features (Abstract, lines 19-21). Unfortunately, this device is for use with an implantable pacemaker, not a "non-invasive" device, as claimed by the applicant. Other references, such as Oka et al (US 5,772,601), describe non-invasive devices

Art Unit: 3766

capable of sensing ejection durations but not changes in these durations. Likewise, the Examiner could not find the combination of an "ejection duration measurement section", a "storage section" for storing correlation data, and an "exercise load intensity detection section", as recited in applicant's claim 17, or a device having similar details, but alternatively reciting a "diastolic time measurement section", as recited in claim 44. Claim 28 recites a non-invasive exercise load intensity evaluation device comprising the combination of a "diastolic time measurement section" and a "diastolic time change detection section". Again, the Examiner was unable to find the change detection section of this combination. In view of the shortcomings of the prior art, the Examiner deems these claims and their depending claims to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
